a yearly tax of one rupee.

STATEMENT OF OBJECTS AND REASONS.

THE funds available for improving roads and water communications in Bengal have been hitherto small: more especially has this been the

case in districts remote from the great trunk roads. The imperial treasury is unable to increase its grants for Bengal roads; the local funds of Bengal districts are very small, and the income of those funds is not increasing. If there is to be any improvement in the internal communications by road and river in Bengal, the funds for such improvements must be raised from local sources by local rates. There has been much discussion as to the form which such local rating should take. The outcome of the discussion was expressed in a recent despatch from the Secretary of State for India to be-that the new cess for roads should be "levied equally without distinction and without exemption upon all the holders of property accessible to the rate." Immoveable property of all kinds has been generally considered as justly accessible to a road rate. The present Bill provides for the levy of a cess on all immoveable property as far as possible "without exemption and wiffle out distinction," except in favor of immoveable property already rendered liable to local rating by the District Municipal Act, and the District Towns Act, 1868. The Bill provides also for the constitution of local bodies which will administer the funds raised in each district.

PROVINCIAL SERVICES PUBLIC WORKS BUDGET ORDERS, 1871-72.

Read again Proceedings of this Government (Accounts)
No. 1 of January 1871, being Resolution of the Government of India, No. 3334, Financial Department, dated
14th December 1870, enlarging the powers and responsibilities of local Governments and Administrations in respect to the public expenditure in some of the Civil Departments.

Bend again Proceedings of this Government (Accounts)
No. 2 of January 1871, containing remarks of the
Hon ide the Lieutenant-Governor on the Resolution

cend above

Read also Resolution recorded by this Government in the General Branch, which was received with endorsement No. 2063 dated 6th instant, making the allotments for the current year to the various departments which have been transferred by the Government of India to provincial control.

REMARKS. - The funds assigned by the Resolution of the General Branch of this Secretariat for expenditure on Provincial Public Works in Bengal during the year 1571-72 read above aggregate Rs. 34,32,039 as follows, viz.—

Permanent assignment made from imperial treasury by Resolution No. 3334 of 14th December 1870 and subsequent orders ... Share in the savings of 1870-71 allotted to the provincial services, Bengal ...

33.13.564

1,18,475

Total ... 34.32,039

2. It will be observed that the amount consideredto be available for expenditure does not include any portion of the estimated public works revenne of the province, though there can be no doubt that such revenue should, in accordance with paragraph 14 of the Resolution of the 14th December 1870, be available in addition to the permanent assignment. There has been question regarding it. and the amount when received will be available for demands arising in the course of the year.

3. The budget of outlay has been framed for the full amount of available fands, or Rs. 34,32,039 under the following unit heads:—

- It may be remarked that the amount set apart for stores from England is provided under the orders of the Government of India, but there exists no definite information of what the actual charge against this Government during the year 1871-72 may be. The amount reserved for minor works, both under civil buildings and communications, is larger in proportion than usual, as there will probably be a necessity for providing payment for several works which have been continued in progress from the past year until the issue of these orders.
- 8. The grant for miscellaneous public improvements, Ro. 14,000, does not call for any
- 9. The grant for repairs to civil buildings is Rs. 4,00,000 against the grant of Rs. 3,99,200 in the past year, and that for communications is Rs. 9,25,000 against a grant of Rs. 9,67,500 in 1870-71. It may be remarked that provision is made for the reasonable maintenance during the current year of all roads which have hitherto been maintained at the charge of imperial funds, but measures are now being taken to determine what roads shall in future be maintained as provincial
- The grant for repairs to miscellaneous public improvements, Rs. 7,000, calls for no remark.

- 11. The previous for estal behiment, Rs. 9,00,090, is untilly heavy; but the grant for imperial public works establishments. Rs. 4,47,000, is very small, and taking the entire establishments both imperial and provincial the total is Rs. 14,27,000 against the grant of Rs. 14,89,000 for the pust year. The question of establishments needs early attention, but is delayed for orders on certain points, which have been referred to the Government of India.
- 12. Out of the total estimated outlay of the province, or Rs. 34,32,089, the amount set apart for expenditure in Assam, the Commissioner of which province is vested in this department with the powers of a local administrator as defined in the Public Works Code, is Rs. 3,48,676 as follows, explusive of the provision made for the branch Office of Account :-CIVIL BUILDINGS

RIVERS THOMPSON,
Offg. Secy. to the Govi. of Bengal.

The 16th June 1871.—The following Note this day recorded by His Honor the Lieutenant-Governor of Bengal is published for general information:—

THE SUBORDINATE EXECUTIVE SERVICE.

I quite agree in the opinions which I find at the commencement of a previous correspondence that it is not desirable to pay young uncovenanted officers 250£ or 300£ per annum for learning their duty by vivi-section, and that it is an extraordinary anomaly that, while covenanted servants have passed many examinations before entering the service, uncovenanted servants should enter without any examination at all. As things stand in this country, I do not desire a competitive or comparative system, but I do desire to establish a positive system of examinations.

I would have it that any person who can give entisinetory proof of character, respectability, and general moral and physical fitness, should be admitted to examination; that passing examination should give no claim to an appointment; but that no person should be appointed to a sobordinate executive appointment who has not passed, except servants of Government, who have proved their capacity by long service in other appointments. As respects these last also, some examinations on the special subjects required for their new daties would be necessary.

I should like to secure

Ist .- A good general education.

2ud.-In the case of natives-a certain knowledge of English.

3rd .- In the case of Europeans -a certain knowledge of the veroacular.

44.-A knowledge of the most important oriminal and revenue laws.

5th.—Some knowledge of surveying, and the simplest elements of engineering.

As regards natives, for the 1st and 2nd qualifications the university entrance examination might be accepted as a minimum. That would probably not be too much to ask of the Behar candidates.

As y higher degrees would be considered as pro tanto in their layer, especially qualifications in civil engineering. The latter would of course render unnecessary all further examination to test the 5th qualification.

All native caudidates should be required to show that they can read and write in the vernacular with such facility as to make them good

mohurirs.

In the case of European candidates, we should test by examination that they possess a thorough knowledge of reading, writing, and arithmetic. Tucy should be able to write well quickly and correctly from dictation, to compose a report, and to do all ordinary arithmetic correctly and quickly. This last should be particularly tested. They should be able to speak and understand the vernacular language, and to read it in print and translate it. Their knowledge of it should be sufficient to enable them to do business easily immediately on appointment.

As regards language, a candidate might choose either Bengalee or Hindonstance; but if he passed in the latter, he would not be eligible for appoint. ment in a Bengal district, and would, therefore, of course have less chance of obtaining an appoint-

The examination in criminal and revenue law would be confined to the Penal and Criminal Procedure Codes and a few selected laws.

I attach much importance to a certain knowledge of surveying and to the elements of engineering knowledge, both as useful for many things, and as showing that we want more than mere office men.

On the whole subject, however, I may say that ! my inclination is against appointing young men to high offices in the first instance, and I would much prefer that we should make certain interior clerk-hips and similar offices open to all who have passed the university untrance examination, and then encourage them to pass in the Criminal Codes and surveying. These who have done well and pared in these branches might well look for promotion.

As the system of limited competition once tried one been for some time in abeyance, and the

present proposal is in some respects different from present proposes is in some respective to draw out new examination rubes. A gried, committee will be appointed to settle the details on the principles here hald dower. Meantime the note may be published as an intimation to all candidates that ting need not hope for appointments till they are prepared to comply with conditions of the characfor here stated, and to submer themselves to examination under rules which will shortly be promulgated.
